

CHEP Romania
Action plan presentation
Lean & Green

March 2023

Gabriel Ivan
Country General Manager
Romania & Bulgaria

AGENDA

1. History of CHEP
2. CHEP Pooling
3. CHEP Romania L&G action plan

HISTORY OF CHEP

1945

End of WW II - US Army leaves behind a wealth of materials handling equipment at their military bases in Australia.

Commonwealth Handling Equipment Pool

Australian government combines this asset base with existing infrastructure to form the Commonwealth Handling Equipment Pool

1949

Privatize CHEP

The government decides to privatize the equipment-handling organization now known simply as CHEP.

1958

Brambles acquires CHEP

Brambles, a business formed in 1875 with experience in materials handling, acquires CHEP.

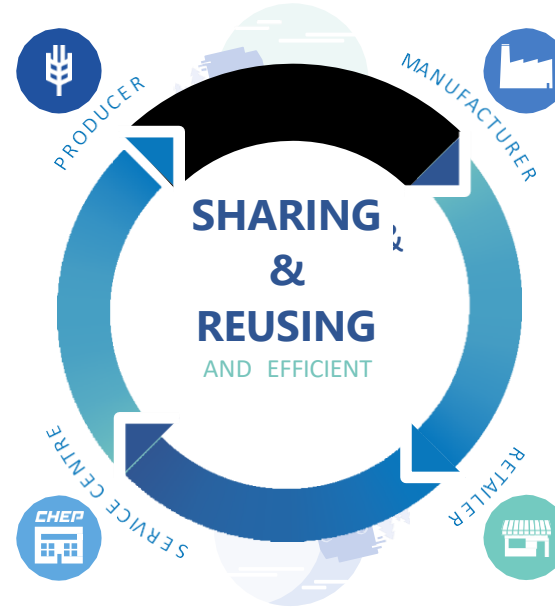

CHEP POOLING

Pallet pooling is based on the principle of the circular economy. You do not buy pallets to exchange, but rent them and share them with other companies.

You outsource your entire pallet management and you also eliminate the hidden costs and you are sure that the pallets delivered meet the required quality standards.

CHEP
A Brambles Company

This is how pallet pooling at CHEP works:

1. We deliver the pallets from the nearest service centre. CHEP's pallets are thoroughly inspected in advance to ensure high quality.
2. The pallets are used to transport goods through the supply chain.
3. We take the administration associated with pallet management largely out of your hands.
4. After use, the pallets are collected and returned to a CHEP service centre. There they are inspected, cleaned and repaired.

TRULY SUSTAINABLE

CHEP

A Brambles Company

The wood the pallets are made of is sourced from certified plantations.

1

Pallets are repaired, if necessary, and reused – thus reducing emissions and use of natural resources.

3

2

CHEP pallets are 10 times more durable than their white-wood equivalent.*

4

CHEP pallets are 100% recyclable. Nothing goes to landfills.

OUR ACHIEVEMENT

ACTION PLAN

CHEP

A Brambles Company

ACTIVITY - Logistics activities related to empty pallets in Romania

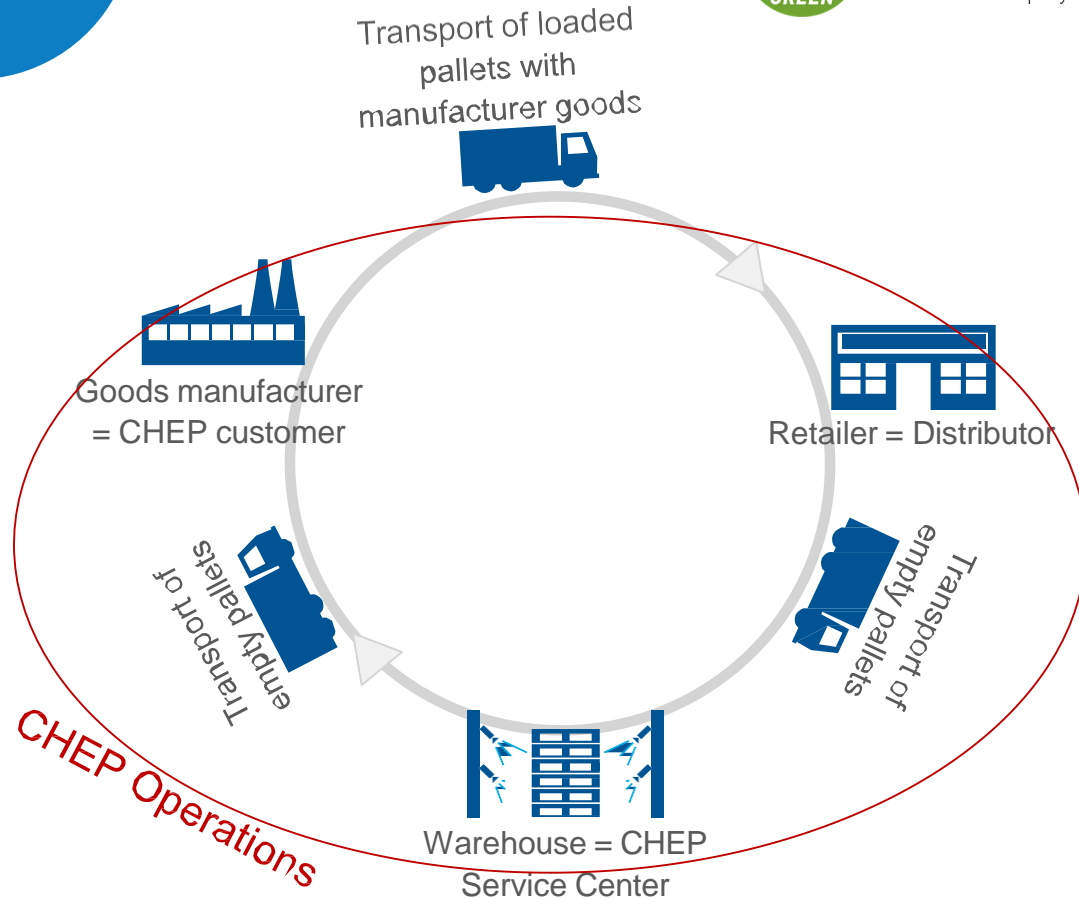

- Transport service centers
- Outsourced logistics activities in all areas
- Unit = pallet (TEU)

DATA COLLECTION - Measurement of CO2 emissions - based on SAP data, industry standards and subcontractor information

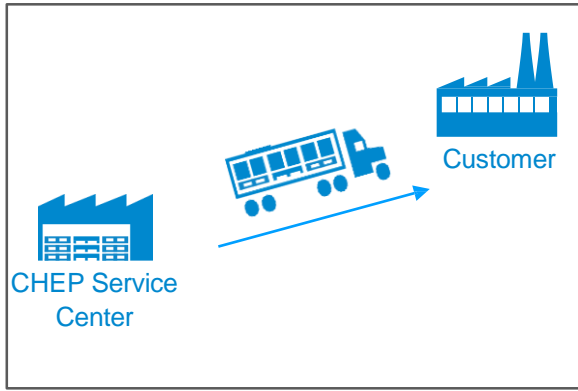

COLLABORATION

- Retailers
- Manufacturers
- LSP's

BASE YEAR - FY2020

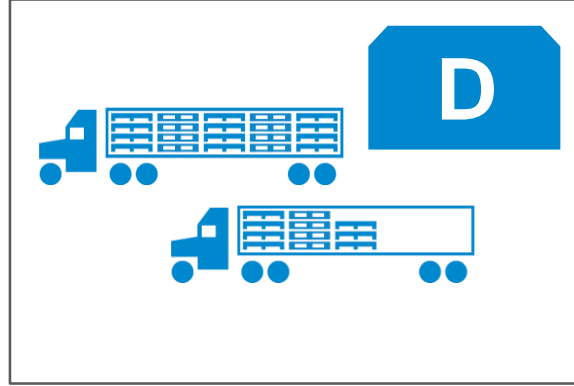

2020-2026 CO2 REDUCTION

TRANSPORT
KM

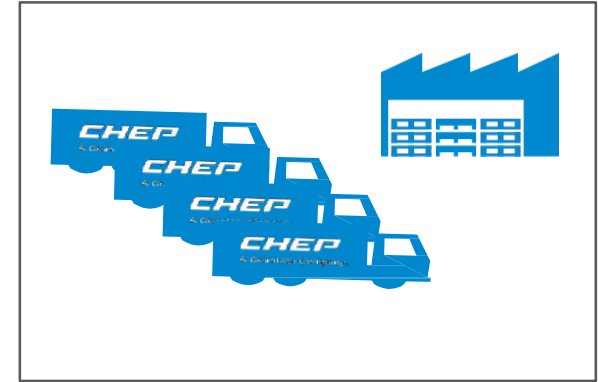

27%

TRANSPORT
CARGO SPACE

10%

INCLUSION &
COLLABORATION

3%

DELIVERY COMPLETING THE ORDER WITH FEWER KM 27%

CHEP

A Brambles Company

1. Minimize non-value-adding activities, i.e. relocations
2. Plant Network Optimization tools to optimize all flows
3. Plan routes with minimal travel distances

Lean & Green

100% Collaboration for 0% emissions

TRANSPORT

BETTER USE OF CARGO SPACE 10%

1. Pallet collection activity
2. To optimize delivery days
3. Partner training for full truck loading/
more often
4. Campaign posters - regular
awareness among targeted partners

COLLABORATION ACROSS SUPPLY CHAIN 3%

1. Retailers
2. Manufacturers
3. LSPs

100% COLLABORATION
0% EMISSIONS
